**Guest Operating System Installation**

A virtual machine is like a physical computer; it needs an operating system. How will you install the guest operating system?

Install from:

☐ Installer disc:

DVD RW Drive (D:)

☐ Installer disc image file (iso):

Browse...

☒ I will install the operating system later.

The virtual machine will be created with a blank hard disk.

Select a Guest Operating System

Which operating system will be installed on this virtual machine?

Guest operating system

- ☐ Microsoft Windows
- ☒ Linux
- ☐ Novell NetWare
- ☐ Solaris
- ☐ VMware ESX
- ☐ Other

Version

Ubuntu

New Virtual Machine Wizard

Specify Disk Capacity

How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host computer's physical disk. These file(s) start small and become larger as you add applications, files, and data to your virtual machine.

Maximum disk size (GB):

Recommended size for Ubuntu: 20 GB

- ☐ Store virtual disk as a single file
- ☒ Split virtual disk into multiple files

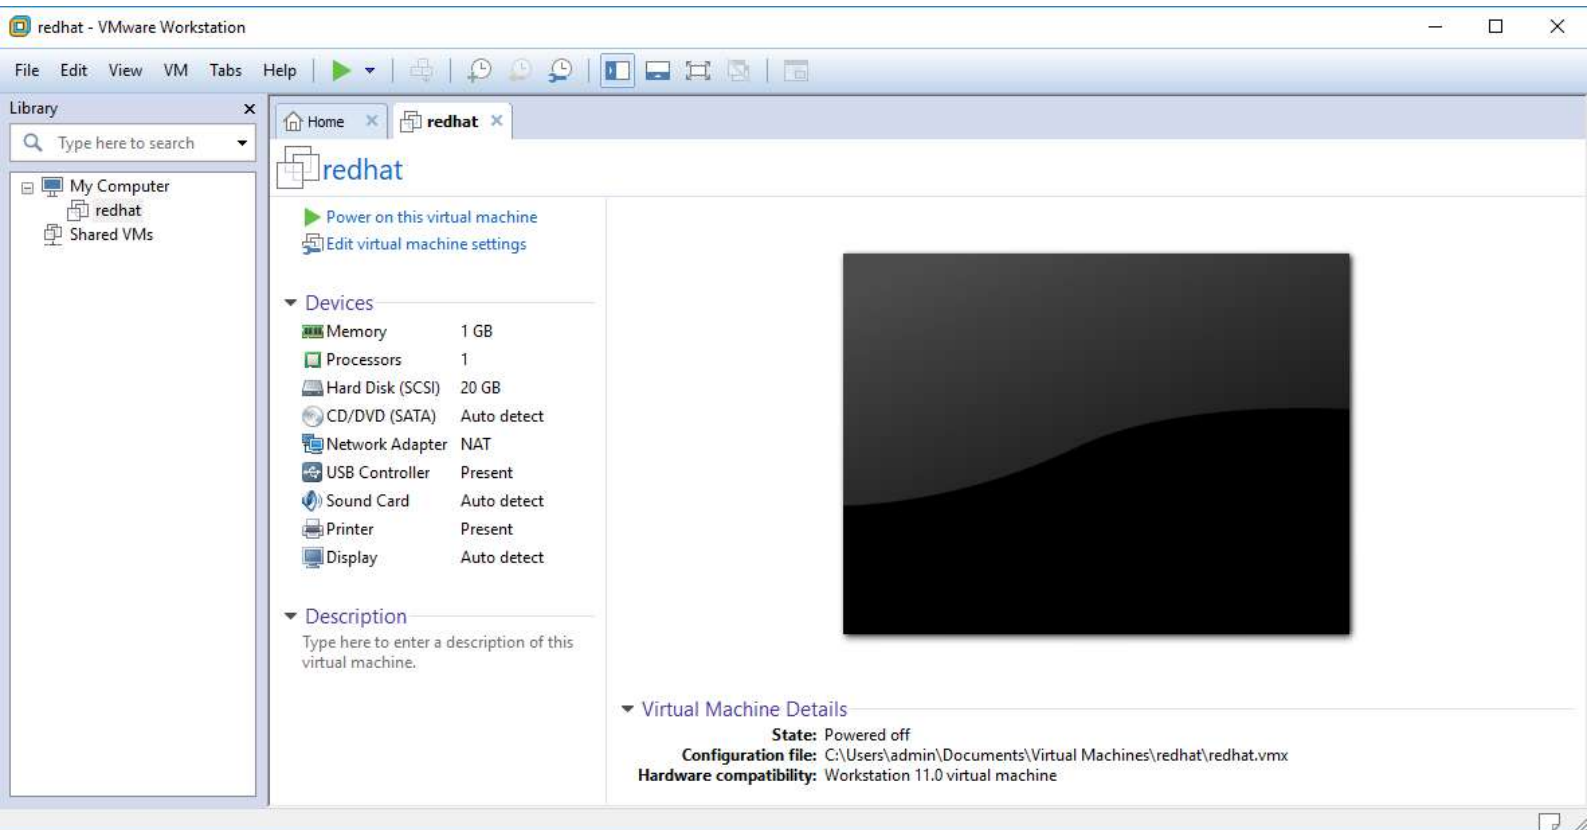

Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.

## New Virtual Machine Wizard

### Ready to Create Virtual Machine

Click Finish to create the virtual machine and start installing Red Hat Enterprise Linux 7 64-bit and then VMware Tools.

The virtual machine will be created with the following settings:

Name:	Red Hat Enterprise Linux 7 64-bit
Location:	C:\Users\admin\Documents\Virtual Machines\Red Hat...
Version:	Workstation 11.0
Operating System:	Red Hat Enterprise Linux 7 64-bit
Hard Disk:	20 GB, Split
Memory:	1024 MB
Network Adapter:	NAT
Other Devices:	CD/DVD, USB Controller, Printer, Sound Card

[Customize Hardware...](#)

☒ Power on this virtual machine after creation
